

Router Table

Knowledge Check

Point out the following tool features

- On/Off Switch
- Fence
- Bit
- Featherboard
- Height Adjustment

Personal Protective Equipment

- Knows whether work gloves be worn while using a router

Safe Operation

- Demonstrates or describes changing the bit
- A: Unplugs router before changing bit
- Demonstrates or describes changing the bit when to push sticks when appropriate
 - Safely executes a bearing cut
 - Safely executes a cut on the fence

Allowable Materials

- Can state 3 requirements of the wood that is cut on routers

Default Configuration

Instructor shows

Help... what is the preferred default configuration of the router table? What wrenches stay attached? How is the guard left.

- Wrenches are on string on hook under table
- Router is brought low enough below table surface to place dust cap on
- Bits are returned from whence they came
- Fence is put back on table
